SUMMARY

Software Engineer with 5+ years of experience building scalable web applications using TypeScript, Angular, Vue.js, and React. Specialized in frontend architecture, modular systems, and state management. Experienced in developing feature management platforms and configuration-driven UI systems that enable dynamic application behavior, faster feature delivery, and improved product iteration.

EXPERIENCE

Software Engineer

CENTAURO SOLUTIONS **February 2023 - Present, Costa Rica**

- Led the design and development of internal platforms that enabled dynamic feature control and UI configuration across multiple applications, improving flexibility and reducing dependency on release cycles.
- Partnered with product and backend teams to define scalable frontend architecture and state management strategies, enhancing consistency and maintainability across projects.
- Drove the migration of a large-scale cross-platform application from Ionic/Angular to Ionic/Vue, improving performance, modularity, and long-term scalability.
- Contributed to engineering best practices, including modular design, code reviews, and CI/CD workflows, supporting high-quality and reliable software delivery.

Frontend Engineer

CLICKLEASE LIMITADA **July 2021 - January 2023**

- Led the development and integration of embedded leasing solutions across multiple partner e-commerce platforms, enabling end users to seamlessly apply for financing directly from product pages.
- Delivered scalable integration solutions adopted across diverse client environments, supporting multiple platforms and expanding the reach of financing services.
- Contributed to the development of a new version of the customer application platform, handling sensitive financial and user data while ensuring a secure, reliable, and user-friendly experience.
- Collaborated with product, design, and backend teams to translate business requirements into high-quality user experiences, supporting continuous improvements in conversion and usability.

PROJECTS / ENGINEERING HIGHLIGHTS

Feature Management Platform (Internal Project)

Centauro Solutions

- Designed and implemented a centralized feature management platform, enabling dynamic feature toggling across multiple applications without requiring redeployment.
- Built a configuration-driven system backed by REST APIs and persistent storage, allowing teams to control feature flags, user flows, and application behavior across environments.
- Improved release flexibility and experimentation by decoupling feature activation from deployment cycles, enabling faster rollout of user-facing features across web and mobile applications.

Modular UI Rendering System (Internal Project)

Centauro Solutions

- Developed a JSON-driven UI rendering engine acting as an interpreter to dynamically generate user interfaces from configuration data, supporting different components within the application, such as containers, cards, and form inputs.
- Implemented recursive component architecture to process hierarchical configurations, enabling scalable and flexible UI composition across applications.
- Reduced development time and increased product iteration speed by enabling dynamic UI updates and feature configuration without requiring code changes or redeployment.

EDUCATION

Bachelor's degree in Software Engineering
Universidad Técnica Nacional • Costa Rica • 2024

Diploma in Information Technology
Universidad Técnica Nacional • Costa RIca • 2020

SKILLS

Frontend: React, Vue.js (2/3), Angular (13+/16+), TypeScript, JavaScript (ES6+)

Architecture: Component-Driven Architecture, Modular Systems, State Management, Async Programming

Backend & Cloud: Node.js, Express, REST APIs, Java (basic), C# (basic), Cloud Integration, CI/CD Pipelines

Databases: MongoDB, MySQL, PostgreSQL

Mobile: Ionic (Angular / Vue / React), React Native (basic familiarity)

Testing: Jest, Jasmine (Foundational)

Tools: Git, GitHub Actions, CI/CD Pipelines, Agile, JIRA, Firebase, GitHub Copilot

Languages: Spanish (Native), English (B2+)
